

Assignment Seven
BSDS Spring 2021
(due 3/12, 11:59pm PST)

Please submit the following online via Canvas

1. What was the most useful (to you) topic we have covered so far?
2. Was there a topic that you would like covered in more detail?
3. Now that you know a little more about data science in general, is there a topic (or topics) that you really want to see covered in this course?
4. What is something about the course (a topic or anything about the course) that you feel is confusing or not working well? On the flip side, what is some aspect of the course that is working for you?
5. Any other comments about the topics covered or the way the course is being run?
